

TIN CODE REPORTING FRAMEWORK FOR ITA E&D MEMBERS

Tin Code reporting offers a comprehensive independent assessment of a company's sustainability performance across 71 ESG aspects⁽¹⁾ developed based on international best practices, using a five-level rating system to show progress

- Valid for one or multiple⁽²⁾ projects
- Voluntary
- Access to 1:1 support and guidance

Tin Code Reporting Value

- Report against standards used by the world's largest tin producers
- Proactively prepare your tin project/company to meet emerging global expectations for tin operations
- Assessment through an independent external assessor
- Publish a Tin Code Report⁽³⁾ showing ESG progress to customers, investors and stakeholders
- Unlock guidance towards progressive improvement through a customised gap analysis report which can help companies achieve long-term ESG goals
- Ability to make claims based on Tin Code⁽⁴⁾

Notes: (1) More or less standards may apply depending on company type | (2) Additional fees may apply | (3) Prior to sign-off by the company | (4) Claims guidance may apply
