Wong Kin Nyap
Chief Operating Officer
Malaysia Smelting Corporation Berhad (MSC)
Lot 6, 8 and 9, Jalan Perigi Nanas 6/1, Pulau Indah Industrial Park, West Port,
Port Klang, 42920, Pulau Indah, Selangor, Malaysia

10th December 2025

Dear Mr Wong,

The International Tin Association (ITA) confirms that Malaysia Smelting Corporation Berhad (MSC) has achieved a **“Third-Party Verified”** rating for Standard 7.3 (Responsible Sourcing). This rating for Standard 7.3 was determined according to the normal Tin Code validation procedure on completion of MSC’s recent independent assurance engagement, and in advance of the next scheduled Tin Code Report covering 72 Standards, in which this rating will be included. The rating and additional information is shown in [Annex 1](#).

- The Tin Code rating was determined by independent external validation and review of third-party assurance engagement and company documents¹
- The third-party assurance of MSC was conducted for the site of the Pulau Indah smelter in Malaysia by [independent auditors registered by ITA](#)
- The third-party assurance of MSC’s due diligence public reporting, policies and procedures was undertaken against the [ITA-RMI Assessment Criteria for Tin Smelters \(v2 Mar 2021\)](#)
- The Criteria and Tin Code Assurance are ‘fully aligned’ standards in [independent Alignment Assessment](#)
- The period covered by the Assurance Report is *1 April 2024 to 31 March 2025*
- No material issues were noted in the assurance report.

Tin Code Standard 7.3 expects that companies evaluate potential risks, seek to avoid support to conflict, human rights and other significant abuses and publicly report on their efforts according to international expectations and laws, in particular the OECD Due Diligence Guidance 3T Supplement.

This letter can be confirmed by reference to the original source on the [Tin Code website](#).

Yours Sincerely,

Susannah Costley-White
Programme Manager (Tin Code)
International Tin Association Ltd

Kay Nimmo
Head of Sustainability
International Tin Association Ltd

¹ As part of this process, various documents were reviewed, including but not limited to the assurance report, management report, due diligence report (step 5), public supply chain policy, transaction listing, auditor qualifications and documentation of the standard.

Annex 1 Tin Code Standard 7.3 rating for Malaysia Smelting Corporation Berhad, Pulau Indah smelter

STANDARD	RATING	ADDITIONAL INFORMATION
<p>7.3 Responsible sourcing Companies^(6,7) will evaluate potential risks, seek to avoid support to conflict, human rights and other significant abuses and publicly report on their efforts according to international expectations and laws, in particular the OECD Due Diligence Guidance 3T Supplement⁽⁸⁾.</p> <p>⁽⁶⁾ Companies with smelters will seek to be third-party assessed against recommended criteria. ⁽⁷⁾ Companies without smelters will seek to apply aspects of the recommended criteria relevant to their own circumstances ⁽⁸⁾ The criteria recommended for standard 7.3 is the ITA-RMI Assessment Criteria for Tin Smelting Companies v2 (Mar 2021) criteria 7.3. Other criteria may be utilised if deemed equivalent after equivalence checks against criteria 7.3 and 7.3 guidance by ITA experts.</p>	Third-party verified	<p>The company has demonstrated that it developed and implemented policies and procedures to evaluate potential risks, and seek to avoid support to conflict, human rights and other significant abuses. It publicly reports on its efforts according to international expectations and laws, including the OECD DD Guidance 3T supplement. During the due diligence reporting period (1 April 2024 - 31 March 2025), the Pulau Indah (PI) smelter site reported sourcing minerals from what the company considers Conflict Affected and High-Risk Areas (CAHRA) and non-CAHRA: Australia, Brazil, Burundi, the Democratic Republic of Congo (DRC), India, Nigeria, Rwanda, Spain, and local sourcing from Malaysia. An additional small proportion (<1%) of input was secondary material. The company has a public Responsible Minerals Sourcing Policy and Due Diligence Report available on its website for the PI Smelter. The company's due diligence management systems have been third-party verified through assurance against the ITA-RMI Assessment Criteria for Tin Smelters (v2 Mar 2021) with an audit report dated 23 November 2025 covering the PI smelter site. The independent Alignment Assessment against OECD Guidance of the standards of the Criteria and the audit management process under the Tin Code shows 'fully aligned'. While the company made some improvements since the last audit, the audit highlights some opportunities for improvement mainly related to the formalisation of internal processes and implementing more active monitoring and decision-making on information to avoid over-reliance on upstream joint initiatives. These did not significantly impact the company's ability to avoid supply chain abuses.</p>
